

# Nicolas Jeannerod

## Curriculum Vitæ

### Career

- 2021–now **Consultant** at **Tweag/Modus Create**. I joined **Tweag** in September 2021, which was then acquired by **Modus Create** in June 2022. **Tweag/Modus Create** is a consultancy specialised, as far as I am concerned, in functional languages (most notably **OCaml** and **Haskell**) and **Nix/NixOS**. I have, since I joined, worked in very different contexts, with very different people, on very different projects. In addition to client work, I am a squad lead internally, mentoring fellow engineers as well as following them and communicating on their behalf to other instances of the company.
- 2024–now **Software auditor** at **Tweag/Modus Create**. In August 2024, in parallel to my work on the **Fediversity** project, I started periodically running code audit for codebases in **OCaml** or **Haskell**. Those vary drastically in scope, but some have been security audits for web applications, in which case I am paired with a security auditor of **Modus Create**.
- 2024–now **Nix engineer** at **Tweag/Modus Create**. In September 2024, I joined the Nix team at **Tweag** and started working on the **Fediversity** project. This project, supported by **NLnet**, consists on my part in the development of **NixOS** modules to ease the deployment of clusters of machines serving e-mail and **Fediverse** software, among other things, to thousands of users.
- 2023–2024  
(13 months) **Haskell engineer** at **Tweag/Modus Create**. From July 2023, with a team of **Haskell** engineers from **Modus Create**, we enhanced the consensus algorithm of the Cardano blockchain, creating tooling to run richer and more complex tests than what existed before, and addressing the vulnerabilities of nodes joining or rejoining the network. This effort terminated during the summer 2024 and the new algorithm, going by the sweet name of **Ouroboros Genesis**, is in the process of being deployed in Cardano nodes.
- 2022–2023  
(8 months) **Research software engineer** at **Tweag/Modus Create**. Following my work with **Hachi**, I joined the internal **High Assurance Software group** in September 2022, where I worked towards a similar purpose on a different tool suite written in **Haskell**: I helped develop **Pirouette** and **Cooked Validators**.
- 2021–2022  
(12 months) **Research software engineer** at **Tweag/Modus Create**. In September 2021, shortly after starting my work at **Tweag**, I joined **Hachi**, an R+D effort by **MELD** aiming at building a dynamic analysis tool suite for smart contracts on Cardano, mostly in Racket. I was mostly working on the concolic execution of smart contracts and on a DSL to specify expectations of such contracts. The effort was discontinued in August 2022.
- 2017–2021  
(3½ years) **PhD in Computer Science** at **IRIF (Université de Paris, France)** with **Ralf Treinen** and **Yann Régis-Gianas** on the “Verification of Shell Scripts Performing File Hierarchy Transformations”. This involved a more theoretical side working on extending feature tree logics and working on their decidability; and a more practical side implementing the actual analysis tooling, from a parser of Shell to a satisfiability solver for formulas in our logics. This effort led to the report of over 150 bugs on **Debian** packages.
- 2013–2017  
(4 years) **ENS Graduate Degree** at the **École normale supérieure (Paris, France)**. This is a research-oriented four-year program including the third year of bachelor, the two years of master and an extra year – in my case, a one year-long internship. The degree requires the validation of extra courses in addition to the bachelor and master.

2014–2016 **Master's Degree in Computer Science** at the **Université de Paris** (France). The “Master  
(2 years) Parisien de Recherche en Informatique” is a research-oriented master program in computer science whose purpose is to train future scientists through intensive exposure to contemporary research.

## Interests

- Abstract I like specifications, abstraction and modularisation. I firmly believe in strongly typed functional programming, compilers, formal methods and program verification.
- Concrete I enjoy working on low-level objects – network, systems or code optimisation, for instance. I am not afraid to dig into standards and RFCs.
- Packaging I try to write good code, well designed and documented, used in practice.
- System On my free time, I administrate a **Debian** server providing websites, email, cloud, etc.
- Talks I love teaching and giving talks and I am said to be good at it.

## Languages

Main	<b>OCaml</b> , POSIX Shell	Natural	Fluent in French and English
Good	<b>Haskell</b> , Racket, T <sub>E</sub> X/LaT <sub>E</sub> X	OK	Web, C, Java, Python, other Lisp

## Outside of Work

- Music I spend a lot of time playing music (piano & **clarinet** mostly, but I love trying all kind of instruments), writing music and typesetting music (with LilyPond).
- SCD I also spend an awful lot of time doing Scottish Country Dancing. This includes dancing it, teaching it, playing music for it and organising local and international events.

---

## Personal Data

**Name** Often referred to as “Niols”  
**Age** 30 years old  
**Cell Phone** +33 6 01 64 48 38  
**E-mail** [nicolas@jeannerod.fr](mailto:nicolas@jeannerod.fr) (or [niols@niols.fr](mailto:niols@niols.fr))  
**Website** <http://nicolas.jeannerod.fr> (or <http://niols.fr>)

## Full Professional Experience

- 2021–now **Consultant** at [Tweag/Modus Create](#). I joined [Tweag](#) in September 2021, which was then acquired by [Modus Create](#) in June 2022. [Tweag/Modus Create](#) is a consultancy specialised, as far as I am concerned, in functional languages (most notably [OCaml](#) and [Haskell](#)) and [Nix/NixOS](#). I have, since I joined, worked in very different contexts, with very different people, on very different projects. In addition to client work, I am a squad lead internally, mentoring fellow engineers as well as following them and communicating on their behalf to other instances of the company.
- 2024–now **Software auditor** at [Tweag/Modus Create](#). In August 2024, in parallel to my work on the [Fediversity](#) project, I started periodically running code audit for codebases in [OCaml](#) or [Haskell](#). Those vary drastically in scope, but some have been security audits for web applications, in which case I am paired with a security auditor of [Modus Create](#).
- 2024–now **Nix engineer** at [Tweag/Modus Create](#). In September 2024, I joined the Nix team at [Tweag](#) and started working on the [Fediversity](#) project. This project, supported by [NLnet](#), consists on my part in the development of [NixOS](#) modules to ease the deployment of clusters of machines serving e-mail and [Fediverse](#) software, among other things, to thousands of users.
- 2023–2024  
(13 months) **Haskell engineer** at [Tweag/Modus Create](#). From July 2023, with a team of [Haskell](#) engineers from [Modus Create](#), we enhanced the consensus algorithm of the Cardano blockchain, creating tooling to run richer and more complex tests than what existed before, and addressing the vulnerabilities of nodes joining or rejoining the network. This effort terminated during the summer 2024 and the new algorithm, going by the sweet name of [Ouroboros Genesis](#), is in the process of being deployed in Cardano nodes.
- 2022–2023  
(8 months) **Research software engineer** at [Tweag/Modus Create](#). Following my work with [Hachi](#), I joined the internal [High Assurance Software group](#) in September 2022, where I worked towards a similar purpose on a different tool suite written in [Haskell](#): I helped develop [Pirouette](#) and [Cooked Validators](#).
- 2021–2022  
(12 months) **Research software engineer** at [Tweag/Modus Create](#). In September 2021, shortly after starting my work at [Tweag](#), I joined [Hachi](#), an R+D effort by [MELD](#) aiming at building a dynamic analysis tool suite for smart contracts on Cardano, mostly in [Racket](#). I was mostly working on the concolic execution of smart contracts and on a DSL to specify expectations of such contracts. The effort was discontinued in August 2022.
- 2021 **Member of the organising committee** of [CONFLANG](#), a workshop colocated with [SPLASH](#) in October 2021.
- 2017–2021  
(3½ years) **PhD in Computer Science** at [IRIF \(Université de Paris, France\)](#) with [Ralf Treinen](#) and [Yann Régis-Gianas](#) on the “Verification of Shell Scripts Performing File Hierarchy Transformations”. This involved a more theoretical side working on extending feature tree logics and working on their decidability; and a more practical side implementing the actual analysis tooling, from a parser of Shell to a satisfiability solver for formulas in our logics. This effort led to the report of over 150 bugs on [Debian](#) packages.

- 2016–2020 **Teaching** at **UFR Informatique (Université de Paris, France)** including both practical and written exercises sessions for a total of 240h over 4 years. In addition to these hours in front of the students, the work included preparing materials and grading exams and projects.  
(4 years)
- 2017 **Google Summer of Code** with **Aymeric Fromherz** and **Nikos Gorogiannis**: “Verification and Testing of Heap-based Programs with Symbolic PathFinder”.  
(3 months)
- 2016–2017 **Research Internship** at **IRIF (Université de Paris, France)** with **Ralf Treinen** and **Mihaela Sighireanu**: “Correctness of Linux Scripts”.  
(1 year)
- 2016 **Research Internship** at **IRIF (Université de Paris, France)** with **Ralf Treinen** and **Mihaela Sighireanu**: “Towards Verification of Shell Scripts”.  
(6 months)
- 2015 **Research Internship** in the **Complogic** team (**McGill University, Montréal, Canada**) with **Brigitte Pientka** in order to help with the development of the proof assistant Beluga.  
(5 months)
- 2014 **Research Internship** at the **Institut de Mathématiques de Marseille (France)** with **Lionel Vaulx Auclair** and **Emmanuel Beffara**: “On a logical counterpart of local non-determinism in classical realisability”.  
(3 months)

## Full Education

- 2013–2017 **ENS Graduate Degree** at the **École normale supérieure (Paris, France)**. This is a research-oriented four-year program including the third year of bachelor, the two years of master and an extra year – in my case, a one year-long internship. The degree requires the validation of extra courses in addition to the bachelor and master.  
(4 years)
- 2014–2016 **Master’s Degree in Computer Science** at the **Université de Paris (France)**. The “Master Parisien de Recherche en Informatique” is a research-oriented master program in computer science whose purpose is to train future scientists through intensive exposure to contemporary research.  
(2 years)
- 2013–2014 **Bachelor’s Degree in Computer Science** at the **École normale supérieure (Paris, France)**. The two years of preparatory classes, completed by first year of the **École normale supérieure**, include a full bachelor.  
(1 year)
- 2011–2013 **Preparatory Classes MPSI/MP\*** at the **Lycée du Parc (Lyon, France)**. Preparatory Classes are an intensive two-year preparation for competitive entrance into top engineering and research schools.  
(2 years)

## Miscellaneous Experience

- 2022–now **President** of the **RSCDS Paris Branch**. I lead the organising committee and represent the branch in front of the members, the RSCDS and the other branches.
- 2019–now **Teacher** of **Scottish country dance** classes at the **RSCDS Paris Branch**.
- 2018–now **Musician** for **Scottish country dance** classes at the **RSCDS Paris Branch** and internationally.
- 2019–2021 **Editor** of the **Paris Book of Scottish Country Dances**, volume 2 as well as its two companion books of tunes. This involves communicating with the different authors, handling copyright considerations, typesetting the book (using LaTeX and LilyPond), printing and publishing it, etc.
- 2018–2022 **Member of the organising committee** of the **RSCDS Paris Branch**.
- 2018–2022 **Organiser and member of a professional band** (~2-3 musicians) playing at various events, mostly weddings. This includes finding the gigs, discussing the organisation with the clients and, of course, playing music.
- 2017–2022 **Organiser and member of an amateur band** (~10-12 musicians) playing for **Scottish country dances**.
- Jan. 2017 **Student volunteer** at POPL in Paris, France.
- Aug. 2012 **Sanitation worker** for the city of Mions, France.

2009–2011 **Member of the organising committee** of the [Orchestre d'Harmonie de Saint-Priest](#), an amateur wind orchestra, and its associated music school, [Vive le Vent](#).

---

## Selected Publications

- 2021 **"Verification of Shell Scripts Performing File Hierarchy Transformations"**. Nicolas Jeannerod. PhD Thesis
- 2020 **"Analysing installation scenarios of Debian packages"**. Benedikt Becker, Nicolas Jeannerod, [Claude Marché](#), [Yann Régis-Gianas](#), [Mihaela Sighireanu](#) and [Ralf Treinen](#). In [TACAS 2020 26th International Conference on Tools and Algorithms for the Construction and Analysis of Systems](#). Core Ranking 2020: A.
- 2020 **"Morbis: A Static parser for POSIX shell"**. [Yann Régis-Gianas](#), Nicolas Jeannerod and [Ralf Treinen](#). In [Journal of Computer Languages](#), Volume 57, April 2020.
- 2018 **"Morbis: A Static Parser for POSIX Shell"**. [Yann Régis-Gianas](#), Nicolas Jeannerod and [Ralf Treinen](#). In [SLE 2018 - 11th International Conference on Software Language Engineering](#). Core Ranking 2018: B.
- 2018 **"Deciding the First-Order Theory of an Algebra of Feature Trees with Updates"**. Nicolas Jeannerod and [Ralf Treinen](#). In [IJCAR 2018 - 9th International Joint Conference on Automated Reasoning](#). Core Ranking 2018: A\*.
- 2017 **"A Formally Verified Interpreter for a Shell-like Programming Language"**. Nicolas Jeannerod, [Claude Marché](#) and [Ralf Treinen](#). In [VSTTE 2017 - 9th Working Conference on Verified Software: Theories, Tools and Experiments](#).
- 2017 **"Le coquillage dans le CoLiS-mateur"**. Nicolas Jeannerod. In [JFLA 2017 - 28e Journées Francophones des Langages Applicatifs](#).

---

## Selected Talks

- Mar. 2021 **"Verification of Shell Scripts Performing File Hierarchy Transformations."** At PhD Thesis Defence.
- Dec. 2020 **"Analysing installation scenarios of Debian Packages."** At [IRIF's Verification Seminar](#).
- Sept. 2019 **"Symbolic Execution of Debian Packages."** At [AVM'19](#).
- Jul. 2019 **"Symbolic Execution of Maintainer Scripts."** With [Ralf Treinen](#). At [DebConf'19](#).
- Jul. 2018 **"Mining Debian Maintainer Scripts."** With [Ralf Treinen](#). At [DebConf'18](#).
- Jul. 2018 **"Deciding the First-Order Theory of an Algebra of Feature Trees with Updates."** At [IJCAR'18](#).
- Jun. 2018 **"Deciding the First-Order Theory of an Algebra of Feature Trees with Updates."** At [IRIF's Verification Seminar](#).
- Sept. 2017 **"Formalising an Intermediate Language for POSIX Shell."** With [Yann Régis-Gianas](#). At [Seminar Gallium](#).
- Jul. 2017 **"A Formally Verified Interpreter for a Shell-like Programming Language."** At [VSTTE'17](#).
- Jul. 2017 **"A Formally Verified Interpreter for a Shell-like Programming Language."** At [Seminar VALS](#).
- Jan. 2017 **"Le coquillage dans le CoLiS-mateur."** At [JFLA'17](#).

---

## Teaching

- Feb. 2020 **"Internet et outils"**. Practical exercises at [Université de Paris](#) (France): Introduction to web programming in HTML5/CSS/PHP/MySQL/JS for first year students in computing. (36h)

- Sept. 2019 **"Principe de fonctionnement des machines binaires"**. Written exercises at [Université de Paris](#) (France): Introduction to binary, circuits and processors for first year students in computing. (24h)
- Feb. 2019 **"Concepts informatiques"**. Written exercises at [Université de Paris](#) (France): Introduction to compilation for first year students in computing. (24h)
- Sept. 2018 **"Programmation fonctionnelle"**. Practical exercises at [Université de Paris](#) (France): Introduction to functional programming in [OCaml](#) for third year students in computing. (36h)
- Feb. 2018 **"Internet et outils"**. Practical exercises at [Université de Paris](#) (France): Introduction to web programming in HTML5/CSS/PHP/MySQL/JS for first year students in computing. (48h)
- Feb. 2018 **"Concepts informatiques"**. Written exercises at [Université de Paris](#) (France): Introduction to compilation for first year students in computing. (24h)
- Feb. 2017 **"Projet informatique"**. Tutoring at [Université de Paris](#) (France): tutoring of second year students in computing during their programming project. (24h)
- Sept. 2016 **"Introduction à la programmation"**. Practical exercises at [Université de Paris](#) (France): Introduction to programming in Java for first year students in computing. (24h)
